

Metronet Yard Damage and Cables Requiring Burial!

Metronet has begin installation of their service in GHPOA.

The Indiana Utility Regulatory Commission (IURC), which was formed a few years ago, removed any requirement for local review or approval for the installation of utilities on city easements.

If this installation has resulted in damage to your yard or if cables are not buried, please immediately email your address to our Community Manager, Meghan Lucas, at MLucas@cas-indiana.com or call Community Association Services of Indiana at 317-875-5600.

GHPOA will accumulate a list of addresses and work with our City Councilor and Indy DPW to facilitate having these repairs made as soon as possible.
